

## **CUSTOM ENGINEERED SEALS, GASKETS & O-RINGS**

# Custom Engineered Solutions

**Fabritech Inc is a custom supplier of EMI RFI shielding products and thermal interface materials.**

A responsive and progressive business partner, we strive to deliver added value through a concept to completion service.

Whether from an existing design or custom-developed solution, Fabritech manufactures, assembles, tests and installs, providing a comprehensive part or component solution. It's an efficient, seamless and effective approach - designed for complete customer satisfaction.

## EXPERIENCED

### Proven Knowledge -

Over 20 years designing EMI, RFI and Thermal Products.

### Broad Abilities -

Deep engineering capabilities with an expert comprehension of best practice requirements.

### Field Proven -

1,000's of designs integrated worldwide in battle harsh conditions.

## PRODUCTS

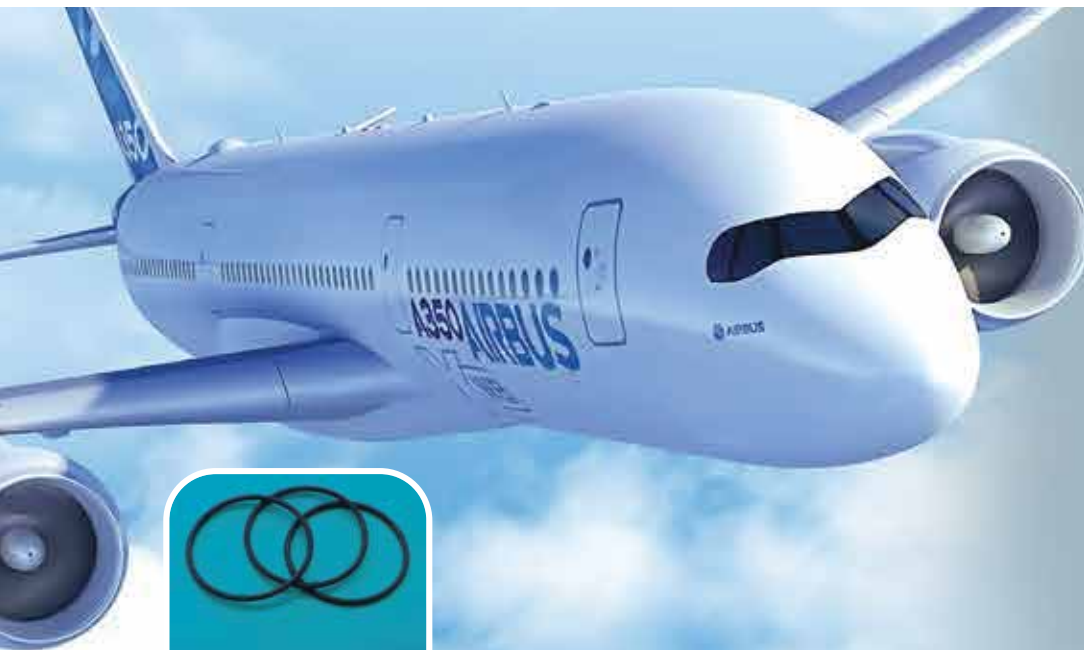

- Custom EMI & RFI Gaskets
- Custom Thermal Gaskets
- Custom Engineered Solutions
- EMI Extrusions and O-Rings

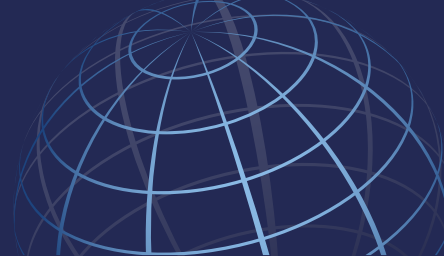

## MARKET SECTORS

- Aerospace
- Unmanned Vehicles
- Land & Ground Support Systems
- Marine & Shipboard Systems
- Additional Markets

**“** Fabritech has a comprehensive & evolved range of manufacturing capabilities to fulfil any project cost effectively, on time and with 100% quality and performance. **”**

## INNOVATE

### Material Chemistry –

Custom formulations to bridge the gap between standard requirements and unique specifications.

### Collaborative –

From concept through production, our customers are our partners.

### Continuous Improvement –

Identify opportunities in the workflow process, plan improvements, and execute changes.

## MANUFACTURE

### Scalable and Flexible –

The expertise to meet the product variations, production schedules, and business targets of our customers.

### Multiple Production Methods –

Demanding customer designs require precision fabrication techniques from Water Jet Cutting to Die Cutting.

### Optimize Resources –

Large on-hand inventory of MIL-DTL-83528 material to accelerate production from order to delivery.

## DELIVER

### A World Class Track Record –

100% on time, on specification and on budget.

### Long Term Relationships –

Trusted manufacturing partners to the largest Defense Contractors in the world.

### Value –

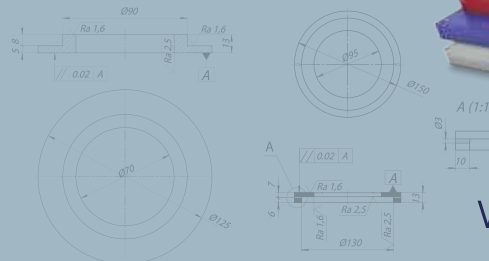

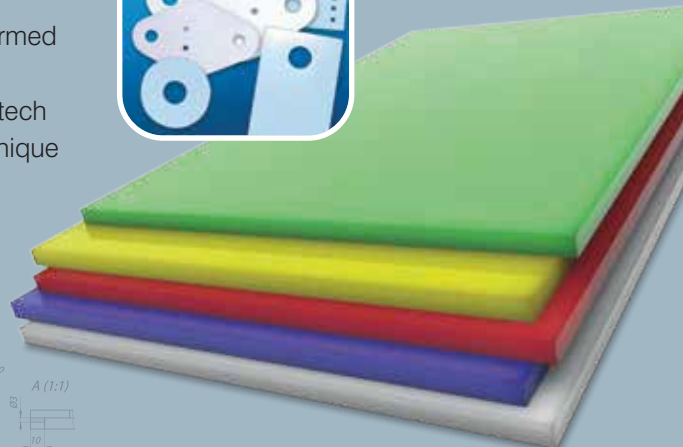

Providing customers superior products at the lowest possible cost.

## FABRITECH HISTORY

Fabritech was established in 1987 as an authorized fabricator and distributor for Parker Chomerics EMI and Thermal products. A family run business, Fabritech quickly became a trusted name for custom EMI and Thermal gaskets.

In 2010 Fabritech was purchased by Sanders Industries and began offering a wider array of products and services, yet retaining the family run feel. As a result of this acquisition Fabritech became part of a much larger organization including; Rubbercraft, Sanders Composites, and Creavey Seal, enhance our ability to leverage engineering expertise to support our growing customer base.

Sander Industries sold the organization in May 2014 to Industrial Growth Partners (IGP), with Rubbercraft becoming the HQ for the newly formed group called Integrated Polymer Solutions. The group (which Fabritech is part of) currently comprises 5 unique product brands and 4 distinct manufacturing locations.

Fabritech Inc. designs, develops and manufactures precision engineered custom elastomeric parts, components and systems

**COMPLETE SERVICE**

Build to **Print**,  
Build to **Model**

As part of Integrated Polymer Solutions, an elite group of manufacturing businesses exclusively focused on polymers such as elastomers and composites.

Fabritech has access to some of the best minds and processes in the business, a global support network and broad-ranging design engineering and manufacturing expertise.

Fabritech Inc. satisfies the stringent demands of safety critical processes.

Fabritech is currently ISO-901 Compliant and adheres to the requirements of the MIL-I-45208A Inspection System.

**“ Fabritech Inc. draws upon the global strength, presence and expertise of Group members. ”**

PART OF  
**INTEGRATED POLYMER SOLUTIONS**

Global  
**Polymer**  
Specialists

**Mission**

To deliver custom engineered solutions, utilizing advanced EMI RFI and thermal elastomer technology & applications expertise.

**Vision**

To be EMI RFI and Thermal experts delivering innovative products and operational excellence that meets or exceeds customer expectations.
